10. LOAD MAINTENANCE TEST (Loading box in fully raised position)**General observations**

Date of test	:	06.03.2023
Initial hydraulic oil temperature before conducting test, °C	:	60
Initial height from ground level, mm	:	3060

Elapsed time (Min.)	:	Cumulative drop in height of unloading box (mm)
05	:	03
10	:	06
15	:	09
20	:	12
25	:	13
30	:	14
Leakage of hydraulic fluid from any part of hydraulic system.	:	None
Working of hydraulic system	:	Satisfactory

11. FIELD TEST

- 11.1** The Infelder was operated in field for 26.60 hours (excluding running-in of 1.0 h) during collection of sugarcane billets from the sugarcane harvester and unloading of sugarcane billets. During the test, the billets of sugarcane (86032 variety) were collected in trailer and the performance with field performance with regard to quality of work, rate of work, fuel consumption, safety and soundness of construction etc. were assessed. The crop and atmospheric conditions during field test with sugarcane crops are given in **Annexure – II**. The crop parameters recorded during the test for sugarcane crops are as under:-

1. Furrow dimensions, m

Length	:	90 to 97
Height	:	0.14 to 0.17
Row spacing	:	1.17 to 1.25
2. Dimensions of billets, cm

Length	:	16.8 to 18.0
Diameter	:	2.8 to 3.0
3. Atmosphere condition

Ambient temp., °C	:	34.1 to 35.8
Relative humidity, %	:	18.1 to 19.3
Pressure, kPa	:	96.4 to 96.5

11.2 Rate of work and fuel consumption:

- During the field test the speed of operation varied from 3.04 to 3.13 kmph.
- The average fuel consumption varied from 2.71 to 2.86 l/h.
- The fuel consumption per tonne of crop collected varied from 0.105 to 0.116 l/t.
- Average box filling time was observed as 0.20 to 0.21 hr, whereas average unloading time was recorded as 49.50 to 50.25 second.
- Average sugarcane billets carrying capacity of infielder varies from 5.15 to 5.25 tonnes.

12. EASE OF OPERATION AND SAFETY PROVISION

- i) The controls provided around the operator are within easy reach, but not labeled with symbols as per Indian standard. Therefore it is recommended that the symbols as per the requirement of IS: 6283-1998 may be provided.
- ii) No inconvenience to the operator was observed during field test of infielder.
- iii) Overall performance in field was satisfactory.

13. THE LABELING PLATE OF INFIELDER

The labeling plate is provided with information about the make, model, capacity, total weight, year of manufacture and address of the manufacturer.

14. TIME REQUIRED FOR DAILY MAINTENANCE

The average labour required for daily maintenance was approximately one man hour.

15. DEFECTS, ADJUSTMENTS, BREAKDOWNS AND REPAIRS

No noticeable defects and breakdown was observed during the test.

16. SUMMARY OF OBSERVATIONS, COMMENTS AND RECOMMENDATIONS

- 16.1 Track width adjustment of trailer axle wheel is not provided and its wheels run on ridge and the compaction in ridge was observed in the field. It may be provided to adjust track width to run the infielder in furrow.
- 16.2 The slow moving vehicle emblem was not provided on the machine. It should be provided on the rear side of the machine.
- 16.3 The machine is designed to use for collecting sugarcane billets from harvester and deliver it to transport vehicle. It is not for general use on road for transportation

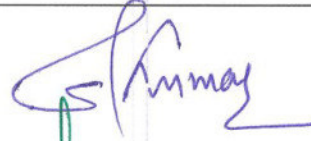

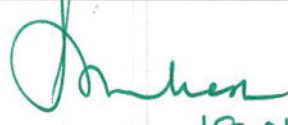

17. TECHNICAL LITERATURE

The following literatures were provided by the applicant.

- i) Operator manual
- ii) Service manual
- iii) Parts catalogue

However, the manual needs to be updated as per IS: 8132-1999.

TESTING AUTHORITY

Er. SANJAY KUMAR AGRICULTURAL ENGINEER	
Dr. MUKESH JAIN DIRECTOR	 18-04-2023

Test report is compiled by Sh. Deny Hasnu, Senior Technician

18. APPLICANT'S COMMENTS

No specific comment was received from the applicant.
